

## Group Philosophy

# Good **Chemistry** for Tomorrow

Creating better relationships among people, society, and our planet.

The word “chemistry” refers to more than just a field of science. It also refers to the compatibility, relationships, and connections among different objects, different peoples, and between people and objects, as well. The Mitsubishi Chemical Holdings Corporation (MCHC) Group, with core competencies in “chemistry,” aims to provide safer, more valuable technologies, materials and products by creating better relationships among the world’s people, societies and our planet. “Good Chemistry for Tomorrow” is our philosophy at the MCHC Group.

### Editorial Policy

In the interest of helping as many stakeholders as possible understand the MCHC Group’s Corporate Social Responsibility (CSR) concepts and the CSR activities pursued by core Group companies, MCHC issues this report as an MCHC Group publication in addition to the CSR reports issued by each Group company.

In this report, our Special Features section focuses on the MCHC Group *KAITEKI* Project, a strategic environmental initiative launched in April 2008, and International Aid Activities toward Solving the Problem of Poverty, which was launched three years ago. Our Special Issue section focuses on areas where efforts should be emphasized in each of our core Group Companies, and introduces the CSR-related activities being implemented to address them.

MCHC will continue to promote the Group’s CSR activities not only through this report, but also by communicating with a wide range of stakeholders.

### Report Scope

This report covers the MCHC Group, but also provides information on the policies of the MCHC.

### Reporting Period

Fiscal year 2008 (April 2008–March 2009)

Note: Some information pertaining to fiscal year 2009 is also included.
